

## GET THE LOOK

Big hair is making a "comb-back"; it's the perfect excuse to start teasing and curling.

### SNIP TIPS

- The big, teased up-do is a hot trend on catwalks and a great way to update longer hair.
- "When growing your hair, plan 18 months ahead and ensure you have seven style or colour changes in that time so you don't

become bored or demotivated with a shapeless style", says Shelene Sher, owner of Tanaz Hair, Nails and Body.

### STYLING TIPS

- Teasing and backcombing are necessary for several styles. Always tease gently and only in one direction.
- Hairspray to hold your hair in place is a must. Try L'Oréal Elnett Hairspray (R49,95).
